- Action Plan to map out next steps

Accelerate the Learning Curve. Speed Productivity. Ramp Up Faster.

Caliper Accelerator
Onboarding

Caliper has a proven track record of helping companies like yours accelerate the learning curve for employees recently moved into new positions or hired externally. And giving employees who are new to the job a head start can have a direct, positive impact on employee satisfaction – and your bottom line.

Caliper's Accelerator is a cost-effective method for quickly getting your new employees engaged with their managers and colleagues. The process is straightforward and simple: Caliper consultants work with your employees to help them get up to speed faster in their new role, identify their strengths, avoid pitfalls, and develop action plans for success.

Your new employees will become more productive faster when they understand how to avoid potential clashes and adapt their work style to fit in with their new team members and managers.

Ultimately, employees will feel more engaged when they realize that you are willing to invest time and money in their personal development during their first weeks in their new role.

Employees who are coached at the beginning stages of a new role will contribute more to the team and reach peak potential sooner.
